

## **ITEM: EMERGENCY KIT "B"**

### **AREA USE: CHLORINE TONNER / TON CONTAINER**

#### **Emergency Kit B:**

The potential leak areas in a Ton Container [or Tonner with capacity of around 930kgs] are

- Leaks from Valves
- Leaks in the Container Body
- Leaks from Fusible

This Emergency Kit 'B' has the tools and fixtures to hold back/arrest leaks in these potential areas.

Easy to handle tools and fixtures enable the users to stop/ handle dangerous leaks in the shortest possible time. Moreover, clear Instruction Manual is provided with each Kit, to guide the user with step by step procedures in handling these tools and fixtures in arresting/containing the leak.

This is a very simple, user- friendly life saving kit and is a must in area where Chlorine container is used.

#### **Pre caution:**

Please note that during gas leaks, Emergency Kits should be used by trained Personnel wearing fully working, Self Contained Air Breathing Apparatus.

Regular Mock- Drillson handling Tonner/ Cylinder leaks should be provided to all Operation / Maintenance Personnel, so that everyone is well trained in handling Tonner / Cylinder Leak Emergencies.

## ITEM: EMERGENCY KIT "B" AREA USE: CHLORINE TONNER / TON CONTAINER

### Salient Feature:
